

Ice rescue boat

Product Images

Short Description

Quickly ready to use, operated by only one person: the versatile LANCO lifeboat serves as a safe work and rescue base in difficult situations.

Description

A fundamentally different design

Instead of equipping the boat with the usual high bow, we provided it with an even leveled profile which is open to the front and back side.

Fabric

PVC coated polyester fabric.

Scope of Supply

Ice rescue boat, packing bag, hand pump, repair kit.

Compressed air inflation

The improved filling system guarantees a quick set-up time. One filling hose with three adapters is connected via quick coupling to the compressed air cylinder with pressure reducer. Three air chambers are inflated at the same time.

The new filling hose can be ordered as a spare part for existing ice rescue boats.

Accessories

- Packing bag
- 2 paddles, divisible
- Compressed air kit (optional)
- Cylinder 6 l / 300 bar (optional)
- Electric blower (optional)
- Lettering (optional)
